

FOR IMMEDIATE RELEASE

World class dizziness clinician certifies local therapists to treat dizzy patients!

Largo, Florida Elaine Libby, Physical Therapist, and Dr. Jaime Taylor Audiologist recently completed advanced coursework and have been certified and received advanced training through the American Institute of Balance (AIB) to evaluate and treat patients suffering from BALANCE issues. We celebrate their achievement and welcome them into an elite group of therapists. The American Institute of Balance is one of the country's best known diagnostic, treatment and educational facilities specializing in equilibrium disorders. The Institute is widely recognized for providing practitioners with the most current clinical and scientific breakthroughs in treatments.

According to the National Institutes of Health, 90 million Americans will experience dizziness, vertigo or imbalance sometime in their lives. As the U.S. population continues to age, with 78 million boomers on the horizon, increasing falls with aging and the danger of fractures and loss of mobility and independence is of great concern. Dizziness is the number one complaint of adults over age 70. The good news is that research now clearly shows that with early evaluation and treatment many cases of dizziness can be treated quickly and easily. The most common form of dizziness, Benign Paroxysmal Positioning Vertigo, which causes vertigo when rolling over in bed, is now treated simply and comfortably with as little as one to two visits.

AIB Certified Provider, Elaine Libby and Jaime Taylor are currently practicing at Millburn Audiology and Balance Center located at 25 East Willow Street Suite B, Millburn, NJ 07041. For more information or to schedule an appointment call 973.564.8878 or visit www.millburnaudiology.com

Are you or someone you know dizzy or experiencing balance issues? Take our quiz online at Dizzy.com to see if you should book an appointment today!

American Institute of Balance

Founded in 1992, the AIB is a worldwide leader in patient care and our doctors have evaluated and treated over 100,000 patients. Center Director, Richard E. Gans, Ph.D., is the Founder and Executive Director of The American Institute of Balance: one of the country's largest balance disorders treatment centers with six current locations including three hospital-based facilities in the Tampa Bay and Orlando areas. He has presented/published over 150 programs worldwide and papers in the area of equilibrium disorders. His most current research is in the areas of pediatric, migraine and psychiatric aspects of dizziness. He is the author of numerous textbook chapters and texts ranging from diagnostic vestibular testing, vestibular rehabilitation, BPPV treatments and pediatric vestibular evaluation.
